## Objective

Accomplished Web Designer/Developer & Graphic Designer with over ten years of experience looking to leverage extensive background into a full-time remote position.

## Professional Experience

### Webmaster, "Confidential"

2018 to Present, Washington, DC

Working strictly on-site with client, transforming government websites into modern, responsive, and 508 compliant websites. Creating fresh wireframes and interactive mockups to the delight of various client divisions. Working with back-end web developers and database admin team members to integrate user interaction via databases to improve user experience.

### Web Designer/Developer, Magnum Multimedia

2017 to 2018, Washington, DC

Worked on-site and remotely with client, transforming government websites into modern, responsive, and 508 compliant websites. Most recently redesigned and developed dol.gov/vets/womenveterans to rave reviews. Also designed infographics, posters and social media graphics as well as reported on Google Analytics metrics for numerous websites.

### Web Designer/Developer, Amdex Corporation

2016 to 2017, Washington, DC

Worked on-site and remotely with client and a very small team, designing and developing numerous responsive and 508 compliant websites in Drupal, ASP.NET, and HTML to rave reviews. Completed 4 websites in 6 months: agingstats.gov, nwd.acl.gov, oam.acl.gov and ncea.acl.gov/state.html.

### Webmaster, Independent Community Bankers of America

2012 to 2015, Washington, DC

Worked on-site and remotely with a small team to design, develop and update content for icba.org and numerous other websites via a CMS and/or SharePoint. Developed responsive websites. Assisted with SQL database maintenance. Primary POC for all image editing needs. Also the sole video editor for numerous videos. Adeptly handling a myriad of difficult situations in a professional manner.

### Senior Web Developer, IntelliDyne, LLC

2008 to 2011, Silver Spring, MD

Project Lead for Department of Defense website development. Worked on-site and remotely with government, civilian personnel and other team members to obtain the scope and requirements for development of dcoe.health.mil. Provided daily website updates, ongoing design, application development and implementation. Provided website traffic statistics. Collaborated with high-level military personnel to design logos and various print materials.

### Web Designer/Developer, General Dynamics Information Technology

2007 to 2008, Silver Spring, MD

Worked on-site and remotely with government, civilian personnel, and other team members. Redesigned and developed afhsc.mil, bringing vast improvements in appearance and functionality. Provided daily website updates, ongoing design, application development and implementation. Redesigned appearance of login screens, resulting in increased logins. Designed the Armed Forces Health Surveillance logo, which is still in use today, and redesigned their monthly print publication, Medical Surveillance Monthly Report (MSMR), increasing readership.

*The website looks fabulous and I've had great feedback from Forum members!*

*- Federal Client*

*With Patricia's intuitive and creative insights, we were able to make some substantial and very effective changes to the site.*
